

Dean's Vector Dungeon

Dean is a knight on a grid. Each turn: start where you are, pick **one** move arrow, add it, and land on the target room.

-2, 2	-1, 2	0, 2	1, 2	2, 2
-2, 1	-1, 1	0, 1	1, 1	2, 1
-2, 0	-1, 0	0, 0	1, 0	2, 0
-2, -1	-1, -1	0, -1	1, -1	2, -1
-2, -2	-1, -2	0, -2	1, -2	2, -2

★ Only ONE number changes each move.

Dice & hearts

Land on the right room, then try a room action. **Roll the die.** If you miss, cross off **one** heart and keep going.

Reading a coordinate

A room's address is (x, y). The **first** number is left–right. The **second** number is up–down. Camp is (0, 0).

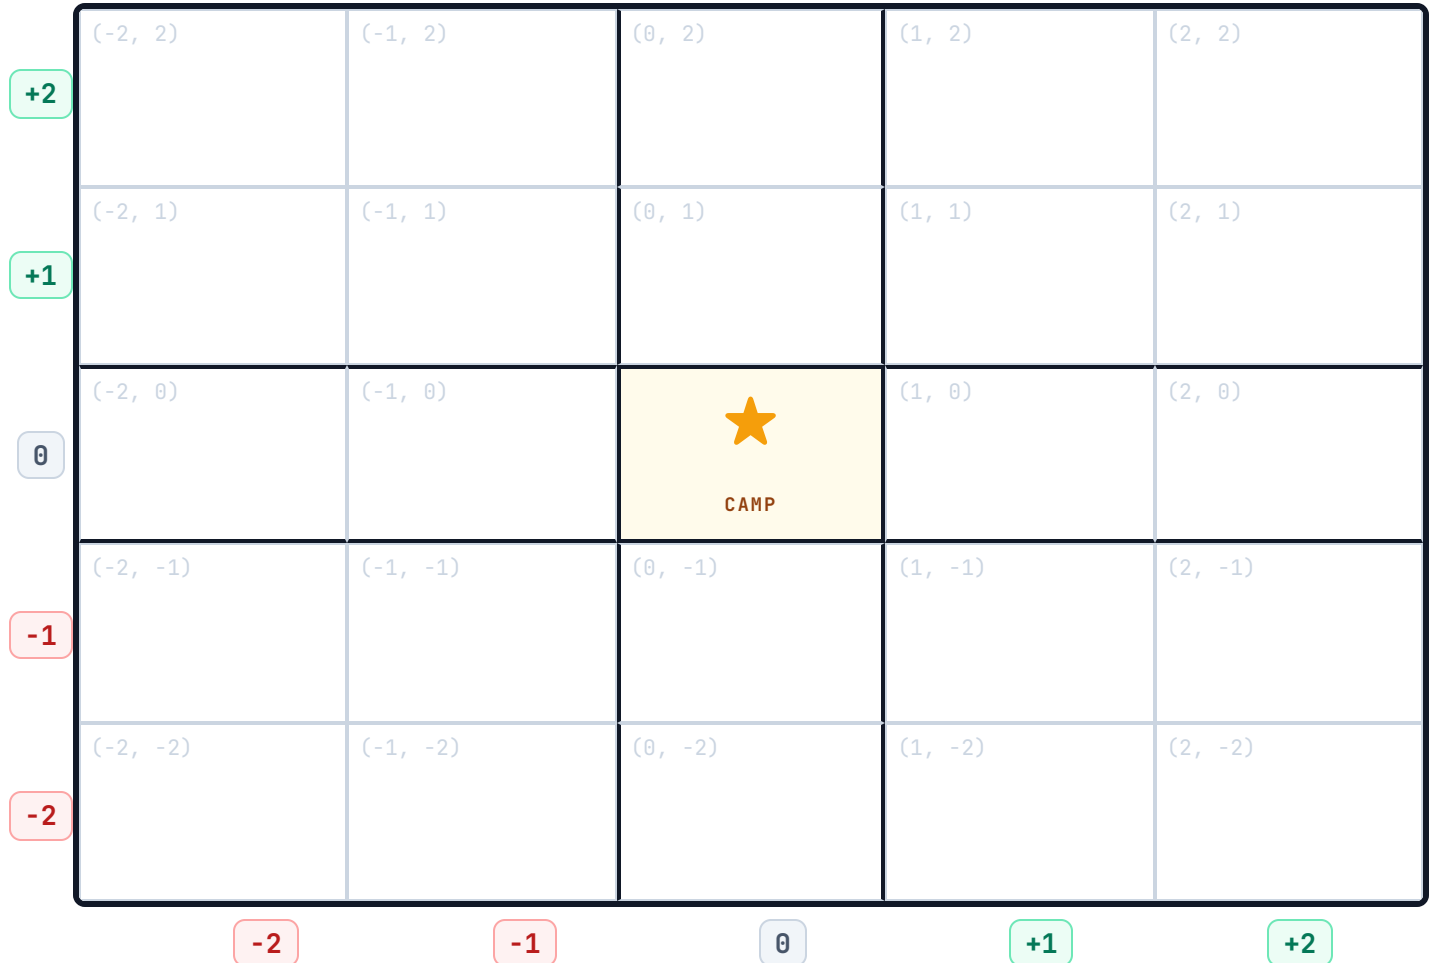

+1 means one step forward. -1 means one step back. 0 means don't move that way.

→ Worked examples

START	MOVE (X, Y)	TARGET	MEANS
(0, 0)	+1 0	(1, 0)	→ one step right
(1, 0)	0 +1	(1, 1)	↑ one step up
(0, 1)	-1 0	(-1, 1)	← one step left
(-1, 1)	0 -1	(-1, 0)	↓ one step down

My Dungeon Map

Put your knight on **(0, 0)** CAMP. Each move, draw a → **arrow** to the next square and write where you landed.

You are here:

(,)

Erase and update it every move.

★ Camp is **(0, 0)** — start here.

→ Draw one arrow for each move.

+1 forward • **0** stay • **-1** back.
